My Tower did really come off 😞😞😞  
Picture to see where the bolts should go

**BMW F 900 GS Forum** Admin Ronnie Lundberg · 12. Okt. 2024 · 📷

Playing with the broken plastic tower  
Maybe something like this 😊

**BMW F 900 GS Forum** Ellen Brand · 📷

Is it normal that the whole tower is moving like this?

I sent my local BMW dealer the pictures of this group regarding the weak point of the front of the bike. They asked me to bring the bike and have come up with this solution for free.

This is how I modified my "new" tower  
I'm not going to mount the gps bracket for now  
Next Friday I will attend in a enduro competition  
Hope the tower will hold together now.

So new tower support replace under warranty, After looking at pictures of the old one no changes on the new one.

So made some new supports wedges on the 3d printer. Just need to slip them in and secure them in with some glue.

This should now dissipate some... Mehr anzeigen

**Just snapped my 2nd tower. They are snapping every 5,500km on me. Anyone else snapped 2?**

Currently in Iran. After 15.000km... hope it does  
the thing. Anyone with same problem?

I made some tower supports. Used a pc plastic 8  
layers 60% fill. And i will drop the stl on this site. I  
used a epoxy glue. But they fit really tight.

Day 4 into the Idaho BDR and the tower broke.  
Let's hope this temp fix gets me through.

I also own a 900GS and my navigation mount broke like many others.

I will soon send an email to my contacts at BMW France so that they can pass the information on to the factory.

in order to give them the best possible feedback, could you send me as many photos as possible on my Instagram?

Jeremy\_motorrad

And the most important thing: photos of possible solutions you have found.

this is not to take away their work but to show them that their passionate customers are trying to find a solution to this problem.
